# Specification of INANBO-T28-SPFD5408-V11

## **Mechanical Specification**

Item	Standard Value	Unit
Display size	2.8	inch
<b>Module Dimension</b>	H/W/D 69.2×50 ×4.2	mm
Active Area	W/H 43.2×57.6	mm
Number of Dots	W/RGB/H 240×3×320	Dot
Pixel size	W/H 0.18×0.18	mm
LCD Type	TFT/ Transmissive / Negative	-
Driving IC	SPFD5408(8BIT/16BIT)	
Approx. Weight	TBD	g
Various color Display	65K	
	262K	
Backlight Color	White

#### Notes:

Contrast Ratio(CR) is defined mathematically as :

Contrast Ratio = Surface Luminance with all white pixels
Surface Luminance with all black pixels

• Surface luminance is the center point across the LCD surface 500mm from the surface with all pixels displaying white. For more information see FIG 1.

- Response time is the time required for the display to transition from to black(Rise Time, TrR) and from black to white(Decay Time, TrD). For additional information see FIG 3.
- Viewing angle is the angle at which the contrast ratio is greater than 10. The angles are determined for the horizontal or x axis and the vertical or y axis with respect to the z axis which is normal to the LCD surface. For more information see FIG 5.
- Optimum contrast is obtained by adjusting the LCD Threshold voltage(Vth & Vsat)

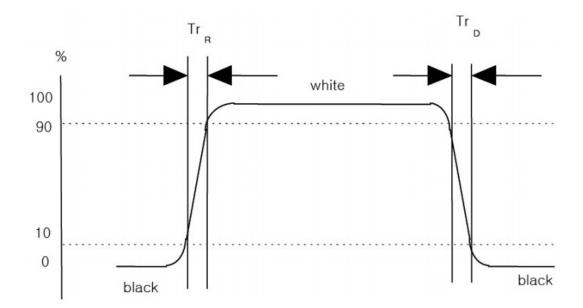

## FIG. 3 The definition of Response Time

The response time is defined as the following figure and shall be measured by switching the input signal for "black" and "white".

#### **General Precautions**

#### **Safety**

Liquid crystal is poisonous. Do not put it in your mouth. If liquid crystal touches your skin or clothes, wash it off immediately by using soap and water.

#### **Handling**

- 1. The LCD panel is plate glass. Do not subject the panel to mechanical shock or to excessive force on its surface.
- 2. The polarizer attached to the display is easily damaged. Please handle it carefully to avoid scratch or other damages.
- 3.To avoid contamination on the display surface, do not touch the module surface with bare hands.
- 4. Keep a space so that the LCD panels do not touch other components.
- 5.Put cover board such as acrylic board on the surface of LCD panel to protect panel from damages.
- 6.Transparent electrodes may be disconnected if you use the LCD panel under environmental conditions where the condensation of dew occurs.
